

Why Use Bank Drafts?

Why do the large business houses with whom you deal always ask you to remit by "bank draft."

Because they know it is the safest and most economical way to remit funds. We advise all our customers to get the habit of using our drafts. They are inexpensive, absolutely safe and expedient. You cannot lose money transmitted in this way and always have an automatic record of your transactions. If you do not thoroughly understand the bank draft system we will be glad to explain it to you.

Uncle Sam's Big Problem

Great warships are sliding off the ways; navy yards and arsenals are working night and day; great mobilization camps have sprung up as if by magic; everywhere the vast resources of the nation are being gathered together for war.

All over the Bell telephone system, thousands of employees are busily engaged in all branches of telephone activity, to keep pace with the extraordinary telephone needs of the nation. And with the increased government requirements, there will be greater demands for commercial service.

Not only is there a great scarcity of materials, but there is a similar scarcity of labor, and already many of our technically trained employees—men who cannot be replaced—have joined the colors.

As time goes on it will become continually harder to meet the demands for service from governmental and private sources—and our patrons are asked to bear this extraordinary condition in mind and to help in the maintenance of an effective service by eliminating all wasteful use of telephone lines and equipment.

Our loyal organization is working continuously to meet the increased demands and your patient co-operation will prove helpful and inspiring.
